

Kymanox Expanding, Hiring For Several New Positions

New Full-Time, Permanent Jobs Have Been Created at Kymanox

Research Triangle Park, North Carolina, United States | Thursday, 13 July 2017 | Kymanox management has approved seven new positions to usher in next growth spurt.

Kymanox is working hard to help clients bring modern medicine to patients in need. To support both current and upcoming commercialization programs for new biologics, drugs, devices, and combination products, seven new positions have been defined and budgeted for immediate hiring.

“These latest openings reflect the growth trajectory of Kymanox and the demand for our type of services,” stated CEO and Founder Stephen M. Perry, “and we are grateful to have this opportunity to onboard additional talent to expand the capabilities of our existing, high-performing team.” Six of the positions are located at Kymanox global headquarters in the Research Triangle Park (RTP) of North Carolina; the other position is located in the greater Atlanta, Georgia market. The positions are a blend of both senior, mid-level, and entry-level in all four verticals at Kymanox: Quality + Compliance, Validation, Process Operations, and Project Management.

Kymanox has hired at a pace of greater than one person per month for the last year and plans to continue at that pace for the foreseeable future. As part of recent hiring, the management team at Kymanox gained two high-profile persons in Richard A. Motruk for Director of CGMP Manufacturing and Technical Operations and Ash Patel for Senior Director of Client Services. The company is looking for individuals that want to help the world produce modern medicine more quickly, more affordably, and with the highest quality and safety standards possible. With a reputation of providing unparalleled contract services, the existing team of process operations, quality assurance, regulatory compliance, validation, and project management experts provides an outstanding opportunity for learning and career advancement.
